

What to Expect the First Week and Beyond

1. @

It is important to keep up with regular use of your artificial tears. At first, every 1-2 hours but NOT less than 4 times/day over the first few months.

- 2. **Use your medications as directed**, including the Pred Forte (anti-inflammatory; shake before placing in your eyes) and Vigamox (antibiotic) until day 7. Wait at least 1-2 minutes in between drops to maximize effectiveness and diminish dilution.

- 5. **DO NOT rub your eyes** or participate in any activity which could jeopardize
